2F kegg
KEGG terms
Phenylalanine metabolism
Cysteine and methionine metabolism
Pyrimidine metabolism
Ribosome
Base excision repair
Arginine and proline metabolism
Lysine biosynthesis
Porphyrin and chlorophyll metabolism
Biosynthesis of cofactors
DNA replication
Phagosome
Pentose phosphate pathway
Glycerolipid metabolism
Ubiquinone and other terpenoid-quinone biosynthesis
Phenylalanine, tyrosine and tryptophan biosynthesis
Tryptophan metabolism
Propanoate metabolism
Peroxisome
Purine metabolism
Citrate cycle (TCA cycle)
Biosynthesis of secondary metabolites
Biosynthesis of amino acids
Carbon metabolism
2-Oxocarboxylic acid metabolism
Oxidative phosphorylation
